

Wireless zoom camera system

AHD

720P/1080P

10.1" AHD wireless monitor:

- Resolution: 1024 (H) × 600 (V)
- Brightness: 600cd/m²
- Working voltage: DC10-32V
- Operating frequency: 2400~2483.5MHZ
- Video recording function: Max. support 128GB SD card
- Receiving distance: 300 meters in open space

AHD 720P/1080P

Parking sensor with camera monitor system

HD

AHD 720P/1080P

- Detection Angle: about 70°
- 13 vehicle models selectable
- Detection distance: 0.3~3 m (5 m optional)
- The parking alarm distance can be set at 0.5-1 meters
- Special high sensitivity digital radar, anti-interference, low false alarm rate

24G Radar camera sensor system

AHD

720P/1080P

- Operating frequency: 24.00GHz
- Transmission wave type: FMCW
- Detection distance: length 0.3-10m
- Detection area visualization: yellow, red
- Antenna beam Angle: horizontal ±60°, pitch ±50°

Millimeter microwave radar camera

The millimeter microwave radar camera has a horizontal angle of 180 and a warning level distance of 3 meters. When an obstacle is found to be near, an early warning within 0.5 meters to 2 meters (beeping) shows the actual distance of the obstacle, an obstacle within half a metre, and the siren keeps making a Didi sound to alert the driver.
